In the Matter of Water for the City of Canyon . . .

Committee Reports; Use Takes Rise

Full Text of Report

The full text of the report given the chamber of commerce board of directors and the city commission by the five-man committee chosen to study the city's water problems is given below. Members of the committee were S. B. Orton, chairman, Dr. J. A. Hill, Levi Cole, Dr. R. A. Neblett and W. A. Warren.

Your committee appointed to make a study of the water supply for Canyon has been and is now working almost day and night for a solution to this problem, keeping in mind both the need and the cost. Members of the committee have spent much time gathering essential facts, inspecting possible sites and sources, and consulting the best water authorities.

As a result of our studies we have reached the following conclusions and by unanimous vote present the following report and recommendations:

1. The present water supply is inadequate for both present and future needs. This is made quite serious by the fact that population is increasing and per capita consumption is rising rapidly, due to increased domestic facilities, lawn care, etc.

2. The committee believes that Canyon should have both a short and a long range water program.

3. For a short range program we suggest that the city attempt to develop water within a short radius of the city, somewhat as it has been doing in the past. We think that two small wells will meet our demands for a few years. These can be put down and equipped at a relatively small cost.

4. For a long-range program we recommend to the City Council that it exercise its option of putting down test wells on the Forrester property and that one 8-inch well be placed on each of three of the four sections and that the wells be pumped until the question of an adequate water supply is settled beyond doubt. If the water supply here proves adequate we recommend that the City Council call a bond election for the purpose of purchasing the water-rights on these four sections and holding same for development as the city may need it. We think that if the water supply here is adequate this site is by far the best protected location available. Also we are of the opinion that it offers recharge possibilities that should not be overlooked.

5. The committee has investigated other possible locations, particularly in the region immediately north of Canyon. We are sure that sufficient water for a short period of years could be had at this site and at less cost than at the Forrester site, but on account of the number of irrigation wells now operating in that section and the number being drilled we feel that this source would soon be depleted. The water table in this vicinity is rapidly falling and the production per well is declining. We found wells where the drop in water level has been as much as 70 feet and a few wells have been abandoned. Moreover, we found that water in this area is spotted and that one good proved section here would cost much more than the entire Forrester tract of four sections; and in our opinion would not last half as long.

6. The committee has given consideration to Buffalo Lake as a possibility and believes that we should not now close the door to that prospect, but since the City has been negotiating for this property since 1954 with no success and since it has very recently been turned over to the Fish and Wildlife Service it would not be advisable to depend at this time on this source.

7. The Committee is not unmindful of the future possibilities of the proposed Canadian River Dam Lake, but considers this source too remote in time for present consideration by Canyon. The program the Committee presents herein will not preclude consideration of this project at a later date.

8. Finally, before the committee's plan or any other is adopted we recommend that the whole problem of water supply be thoroughly aired before the public, but that action be not postponed too long.

The Canyon News

Sixty-second Year | Canyon, Texas | Wednesday, July 3, 1957 | Number 13

PERMITS NEAR HALF MILLION

Four new residences included in the building permits issued for June helped bring the building total for the year to $418,200. The June total was $49,500.

A total of six permits were issued during June. They were:

S. B. Loudder, 1820 Second Avenue, garage addition, $500, June 3.

Carroll Vaughan, 407 Taylor Lane, residence, $14,000, June 6.

W. F. Haggard, 2416 Seventh Avenue, addition, $2500, June 14.

Crosby K. Hammons, 402 Taylor Lane, residence, $15,000, June 18.

Arlen A. Ruthart, 607 Eighth Avenue, residence, $3500, June 19.

M. B. Sims, 2411 Eleventh Avenue, residence, $14,000, June 19.

4-H County Camp Set for Monday

Members of 4-H Clubs in Randall County will hold an overnight camp Monday at the VFW Hall just north of Canyon, County Agent John Brazzil has announced.

Invitations have been sent to 160 4-H Club members and adult leaders, he said. The camp will begin at 1 p. m. Monday with registration.

During the afternoon, a 4-H Records workshop will be held. Following supper, the schedule calls for recreation leadership training and a party. Tuesday morning another training session will be held.

The camp will adjourn at 11 a. m. Tuesday.

Boys attending the camp will sleep on bedrolls along the creek, while the girls will stay in the VFW Hall. Both supper and breakfast will be served.

Major League Team Portrait

Included on the Yankee roster are Johnnie Sikes, left rear, Dudley Moore, Harry Lisle, Wallace Busteed, Tommy Higgins, Bill Phillips, Preston Prichard and Mike Raef; and George McBride, left front, Jodie Sheets, Ronnie Brock, Bill Long, Bruce Winn and Bill Jarnagin.

Daily Use Jumps Over Two Million

Water use in Canyon rose to more than two million gallons Monday as the city was in the midst of a heat wave that saw the mercury over 100 degrees from Saturday on. Usage of water was near the two-million mark both Saturday and Sunday, and topped the figure on Monday.

Monday's use, measured from 8 a. m. Monday to 8 a. m. Tuesday, was 2,155,200 gallons. The total was just under the 2,156,000 maximum figure set in August, 1956, as the peak for last year.

When the heat wave hit Saturday, use of water in Canyon rose to 1,898,000 gallons. The temperature was near 104 degrees. On Sunday the total use was 1,834,000 gallons. Since the 27th of June, water use has been more than 1.5 million gallons a day, records from the pump station show.

In order to keep the daily use from reaching the critical stage, the city commission has asked that citizens limit their use of water as much as possible. "Let's keep it on a voluntary basis," Mayor Hosea Foster said.

The commission has asked that as many persons as possible do their watering early in the day so that usage can be spread out as much as possible. In the heavy day Monday, the greatest use was from 5 p. m. to 9 p. m. when the water level dropped in the underground storage tank dropped 2½ feet. It had dropped two feet between 8 a. m. and 5 p. m.

The pumps at the pump station ran continuously almost all night restoring the water level in the underground tank.

For 20 days in June, when there was 3.19 inches of rain, the water use in Canyon was more than one million gallons. For the last four days of the month, the use was more than one million gallons. For the last four days of the month, the use was more than 1.5 million gallons.

On three other days in the month, the 20th, 21st and 22nd, the use was also over 1.5 million gallons. On one of those days, the 22nd, the use was 1,664,300, and there was .85 of an inch of rain.

The total use for the month of June was 33,545,100 gallons, an average of 1,118,170 gallons a day. For June, 1956, the total use was 39,623,600.

Production capacity for the city's water system is 2.6 million gallons.

Since 1954, Canyon has had at least one day each summer when the use of water went over two million gallons. The highest use ever recorded was 2,599,000 gallons in August, 1954.

In 1955 the peak use was 2,246,000 gallons late in July. The 1956 peak came on two days in August. It was 2,156,000 gallons.

Bulletin! !

Use of water rose to 2,262,800 gallons Tuesday, the pumping meter at the pump station showed at 8 a. m. Wednesday when the graph was changed.

Winters Brings First Wheat Here

Leonard Winters, who farms about seven miles northwest of Canyon, brought the first load of 1957 wheat into Canyon rather than Jack Vincent, as reported last week in The Canyon News.

Winters' wheat was brought to Consumers Elevator on Thursday, June 20. Vincent's was brought to Farmers Elevator on Monday, June 24.

The wheat brought in by Winters tested 59 pounds per bushel and the moisture content was 14.

City Receives Report of Inspection Of Fire Department by State Commission

Recommendations for changes that should be made in the Canyon Volunteer Fire Department were received by the city Monday in a letter from George C. Hawley, chief engineer for the Sttae Board of Insurance.

The fire department was checked by Gil Kuykendall, an insurance board engineer, early in June.

The letter suggested that Canyon should have a full-time fireman who should live in the fire station, and recommended that the 1950 pumper be overhauled in an attempt to raise the pumping capacity to 500 gallons a minute, the minimum necessary standard.

When the department was checked, the truck pumped less than 500 gallons per minute. The letter said the city should construct a rack for drying hose after it is used, and the hose should be checked yearly for a pressure rating of 200 pounds per square inch.

Also suggested for Canyon is a revision in the building code to provide for a secondary fire zone. The present ordinance has only one fire zone, that around the square. The letter also said that a two per cent credit could be established if the city commission would pass an ordinance offering a reward for arsonists.

Another credit could be established if a combustible roof survey would be made, providing the survey shows that 75 per cent of all roofs in town were non-combustible.

Hawley complimented the city on its pump station and network of water mains. The letter said the water main system is in "very good condition," and the pump station is "excellent." The letter stated that all water mains serving fire plugs must be at least six inches in diameter.

The letter requested information on the size, depth, capacity and location of any new water wells which the city might drill. When he was in Canyon, Kuykendall said the waterworks system is in good shape if the city's wells could only produce enough water.

Hawley's letter said that Canyon should send two firemen to the fireman's short course at Texas A&M this summer. The city commission has authorized expenses for two firemen to attend the course if two members of the department will volunteer to go.

Texas A&M Scholarships Awarded To Two Canyon High Graduates

Leo Rigsby, 1957 graduate of Canyon High School, has been named winner of one of 85 Opportunity Award scholarships at Texas A&M. The scholarship is for four years.

Charles Conatser was also named as winner of another scholarship, although not an Opportunity Award scholarship.

Winners of the Opportunity Awards were chosen by a faculty committee following statewide competitive examinations given to more than 600 candidates on April 27 and May 4.

The opportunity scholarships are valued from $800 to $1,200, recipients receiving $200 to $300 per year for four years plus part-time employment provided by the college.

The plan was started at A&M 11 years ago and is supported by former students, clubs, business corporations, foundations and individuals.

Ted Lowe, formerly of Canyon, is attending A&M on an Opportunity Award scholarship and is now a senior.

Budget Hearing Monday Night

A public hearing on the proposed $190,703 budget for 1957-58 for the City of Canyon has been set for 7:30 p. m. Monday in the city hall. All citizens who are interested in the operation of the city are invited to attend the hearing, according to the members of the city commission.

The new budget proposes an increase of $27,374 over last year's budget. About half of the increase is budgeted for street repairs and maintenance.

In addition to the general expenditures of $190,703, tax bond requirements for next year will be $38,297. Revenue bond requirements are budgeted in the water and sewer departments as general expenditures.

Copies of the proposed budget will be available to all citizens who attend the public hearing.

Nine Scouts Leave Tuesday for Trip

(Nine Canyon Scouts will accompany other scouts of this area on a canoe trip in Minnesota and Canada beginning next week. Scout Bill Cornette, who will make the trip, will be a special correspondent for The Canyon News while he is away. Editor)

By BILL CORNETTE

Nine Canyon Explorer Scouts will be leaving Tuesday for the Charles L. Sommers Canoe Base 23 miles out from Ely, Minn., and a few miles from the Canadian border.

The Canyon Scouts will make the trip from Amarillo on a chartered bus which will carry also a crew of scouts from Amarillo and another crew composed of Hereford and Dumas Scouts.

The schedule calls for the scouts to reach the canoe base at about noon on Thursday, July 11. There they will receive a brief and intensive training in the safety practices of canoeing and in the various paddle strokes.

On Friday, July 12, they will leave the base in their canoes for eight days in the Canadian wilder-

(Con't. on Back Page Section 1)

Refuge Manager Named at Buffalo

Robert L. Darnell became refuge manager at Buffalo Lake on Monday, according to an announcement made by the U. S. Fish and Wildlife Service.

In a letter to the Texas Game and Fish Commission, John C. Gatlin, Fish and Wildlife Service regional director, said administration of the lake will be taken over by that service.

Darnell has been stationed at Muleshoe. He will be replaced there by Thomas W. Martin, one of the assistant refuge managers at the Wichita refuge in Oklahoma.

Stork Specials

Mr. and Mrs. Orvil Brummett of Weatherford, Okla., are the parents of a boy, Terril Lee, born June 28 at Perryton. Mr. Brummett is attending pharmacy school at Weatherford.

Lions Install New Officers Wednesday

New officers for the Canyon Lions Club were installed Wednesday in a ceremony conducted by the Rev. Strauss Atkinson.

President for the coming year will be Rex Reeves, who was absent from the installation attending the annual convention of Lions International in San Francisco.

Other officers are Clay Cooper, first vice president, Clarence Kincaid, second vice president, Bill Wilson, third vice president, Burney Slack, secretary-treasurer, Don Briggs, tail twister, and Wilbur Truitt, lion tamer.

New directors of the club are Bill Counselor and Normand Madore.

Mr. and Mrs. J. Howard Bentley and family of San Mateo, Calif., are spending a few weeks with her parents, Mr. and Mrs. Charles Harter.

1½ Miles of Paving Finished in City

More than 1½ miles of paving were completed during the past week, City Secretary Andy Boggs announced.

He said that 25 blocks of the neighborhood paving project started last year were topped with asphalt and gravel. Another 10 blocks remain in the project.

The city expects to top them as soon as the base is prepared.

Garden Club Will Meet With Hines

The Garden Club will meet July 11 at 7:30 p. m. in the home of Mr. and Mrs. K. E. Hines, 211 Fourth Avenue. All members are urged to be present.

What's the Attraction?

These cows are lined up, eagerly anticipating a twice-daily treat. For more pictures on what happens, see page 7.

Randall Little League Stands in Double Tie

With only four games remaining before the end of the first half of the Randall County Little League season, the race is tighter than a tick sticking to a cow's leg.

The Redlegs and Braves are tied for first with four wins and three losses each (.571 percentage) and the Yankees and Dodgers are tied for second with three wins and four losses each (.429 percentage).

The league has a lay-off this week for the Fourth of July holiday, with only one game, which was played Monday night and was a makeup for a game rained out earlier in the season. Play will resume Monday night with the Dodgers pitted against the Redlegs. Tuesday night the Yankees will play the Braves.

The games played in the past week were:

☆ ☆ ☆

Yankees 7, Redlegs 6

On Thursday night, the losing Redlegs held the lead until the fourth inning when the Yankees went ahead by one run and ended up winning 7-6.

The Redlegs stepped out in front in the first inning by scoring three runs off three hits. Bobby Evans, Joel Richardson and Steve Burgess scored.

In the second inning, the Redlegs picked up another run off two hits, with Evans scoring again.

In the third, the Yankees began their march, with one run off two hits. The run was made by Preston Prichard.

But in the fourth, the march became a race. The Yankees scored four runs from three hits. Harry Lisle, Bill Phillips, Tommy Higgins and Wallace Busteed crossed the plate.

In the fifth, the Yankees stretched their lead by another run off two hits. George McBride made the score.

In the top half of the sixth, the Redlegs tied up the score by getting two runs across with Evans and Richardson making the trip.

The Yankees came out on top by scoring Prichard in the bottom half of the final inning.

Winning pitcher was Ronnie Brock and the loser was Burgess.

Braves 7, Dodgers 6

An almost disastrous fifth inning for the Braves nearly cost them the game Saturday night, but a final run in the sixth put the game on ice, with the score being Braves 7, Dodgers 6.

Mike Calliham and Bobby Chumley hit for the Braves in the first inning and Calliham scored to take the lead. Another run was scored by Don Gough in the top half of the second inning.

The Dodgers cut the lead in half by scoring one run in the bottom of the second, with Larry Holman crossing the plate.

Neither team scored until the fifth, when the Braves took four runs off five hits, and batting through the roster. Scoring were Tom Langston, Calliham, Chumley and Gough.

In the bottom half of the fifth, the Dodgers tied up the game with five runs off five hits. The Dodgers batted through the batting order and started again.

Scoring in the fifth for the Dodgers were Bill Albracht, George Cox, Bill Ashley, Holman and Johnnie Sims.

The Braves regained their lead in the sixth with Calliham scoring after a two-base hit by Mickey Fitts.

Albracht was the losing pitcher and Dennis Kelly was the winner.

Redlegs 18, Yankees 7

In a makeup game Monday night, the Redlegs put on a run-spree in the second inning and came out on top of the Yankees by a score of 18-7.

Pitching for the Reds, Steve Burgess struck out seven Yankees in winning. Harry Lisle pitched for the losers and struck out eight Redlegs.

The Yankees started the scoring with two runs by Bill Long and George McBride in the top half of the first. The Redlegs came back to tie the score with runs by Joel Richardson and Alex de Schweinitz.

In the second, the Yankees failed to score and the Redlegs took advantage of them. Crossing the plate for the Reds were Bobby Evans, Richardson, de Schweinitz, Burgess, Don Hawkins, Davis Price, Gary Fletcher and Tommy Sanford.

In the third, the Yankees picked up two more with McBride and Lisle turning the trick. The Redlegs doubled them, however, and Richardson, de Schweinitz, Burgess and Bob Begert scored.

In the fourth, the Yanks went down in order and the Redlegs continued scoring. Evans and Richardson scored this time.

In the fifth, Bill Phillips scored for the Yankees, while Price, Fletcher and Sanford scored for the Redlegs.

Jodie Sheets and Dudley Moore, who finished the game pitching for Lisle, each picked up a run in the sixth.

EDITORIAL

Views and Comments

I see where Hurricane Audrey's death toll is going to run somewhere between 350 and 400, and all the papers are saying it was a horrible carnage.

Tomorrow, one week after the hurricane, a four-day holiday begins and the death toll from it is expected to be 500. All the papers will say it is a shame and most everyone else will pass it by. After all, that's the way we celebrate the anniversary of the founding of our nation.

Let's all jump into our cars and head out for the highways to get our share before someone beats us to it.

★ ★ ★

I'm not so young that I can't remember a sort of old-fashioned Fourth of July, and although I can't remember if my parents enjoyed it, I remember that we kids thought it was fine.

One of the most memorable, probably because it is the most recent, was in 1939. There was a parade, a celebration of some kind on the square. We Boy Scouts had a refreshment booth, and other groups did, too, no doubt.

I have no idea whether there were any speakers, I probably wouldn't have noticed. But there were lots of fire crackers, and hours of fun running around amongst the knots of people on the lawn.

I guess that most people were too broke in those days to take long trips at the drop of a hat. Cars weren't so powerful nor fast, and the highways were less crowded, although smaller.

☆ ☆ ☆

Some time ago, I heard a man (and I can't remember now who it was) tell the difference between an East Texan and a West Texan.

He said the main difference is that East Texans are broke and they know it, and West Texans are broke and don't know it. We West Texans are so busy living it up high on the hog that we don't have time to realize how bad off we are, and just go ahead enjoying ourselves.

☆ ☆ ☆

On the front page of the paper this week is the full text of the recommendation given the chamber of commerce board of directors and the city commission by the five-man water study committee chosen by the chamber.

The committee met for a great number of hours of discussion and study of records and research. The members made several trips to the countryside and to interview people who know things about water supplies. In all, it probably took upwards of 24 solid hours of work on their part.

The recommendations may seem a polyglot of ideas, but it represents a compromise on the part of the members. At the outset, they decided to work until they could find a plan of action which all could agree on and all could back with their signatures. The five men, S. B. Orton, chairman, Dr. R. A. Neblett, W. A. Warren, Levi Cole and Dr. J. A. Hill, agreed to the recommendations and agreed on the wording of the report.

Those citizens are to be commended for the speedy completion of their task. Even more, they should be commended for agreeing to make the study and stick their necks out and make recommendations. It's fairly unusual around Canyon for anyone to stick his neck out "for" anything. More commonly anyone who is active is "agin" something, although lots of them won't dare to sign their names to printed and written statements.

The recommendations of the committee are worthy of diligent study by citizens of Canyon. Many of the rumors and stories circulated during the recent bond election were traced down and proven false to the satisfaction of the committee members.

The city commission is not bound to take any action on the proposals in the committee's report. At this writing, the commission has taken no action, nor have they met to discuss the report. When it was submitted Friday night, the commission received the report and adjourned without planning any course of action.

The Canyon News would like to offer its congratulations to the five members of the citizens committee, and would like to recommand that other citizens do the same.

☆ ☆ ☆

Already, some people in Canyon are out working to defeat the "bond election that will be called." They have no earthly idea what any bond election would cover, and they can only guess that one will be called.

People like that are bad citizens. Not only are they completely selfish, looking out for what they think is their own best interest, but they are so short-sighted they can't even be sure what their own best interests are.

The usual statement about short-sighted people is that they can't see beyond the ends of their noses, but these we have are so shortsighted they can't even see as far as their noses, much less past them.

If we happened to go in for that old plan of offering orchids for good deeds and onions for bad ones, our orchids would go to the citizens committee and our onions would go to those folks who are doing such a sorry job of being citizens.

☆ ☆ ☆

We should all be on the lookout for things that we can do to make Canyon a more attractive place to visit and to live. Last week I saw one thing we can do soon, and it will be a relatively inexpensive item.

Down south in the strip between the new lane and old highway, there are a few trees still standing. The sight of the trees is a gentle hint that the town coming up must be a nice, cool place on a hot summer day.

When the construction is finished, we in Canyon should get permission from the highway department to plant more trees in that center lane, and maybe even a few on each side of the right of way.

Lots of trees are growing between Canyon and the top of the hill to the north, but when the work is done there, some filling in will be helpful.

Don't you think we can all get together on a simple project like that, and do something that will benefit us all even if in no other way than a little self satisfaction?

☆ ☆ ☆

I see where some "liberal" newspapers have been getting all over the Houston Independent School District board of trustees for banning textbooks that are overly favorable to the United Nations. It is the privilege of the school board to ban or approve textbooks, and it is also the privilege of newspapers and citizens to criticise the school board.

But the "liberal" papers have been criticising the Houston school board on the basis that it makes good propaganda for the Russian communists, not because they feel that the United Nations deserves the support of the people of the United States. What difference does it make if the Russians do use the action of the Houston school board for propaganda.

More people do things and get into trouble while trying to keep the neighbors from talking. Most everyone is afraid to do thus and so because the "neighbors will talk."

And that's what the "liberal" papers are afraid of with the Houston school board. If those papers think the school board did wrong, they should criticise. But they should pick a better reason than propaganda. People who do things get talked about, but they get things done.

Wayside News

The Rev. Merle Weathers filled his regular appointment Sunday morning. There were no services Sunday night.

Bible school is in progress with a good attendance of 46 children. They will have their final program Sunday night.

Mr. and Mrs. Paul Wetzel, Ronnie, Marlyn and David are spending this weekend visiting relatives in and around Sherman.

Mrs. Robert Adams, Mrs. Willie Modisette and Charlotte Adams were visiting and shopping in Canyon last Wednesday.

Shelia Payne of Amarillo spent this week with her grandparents, Mr. and Mrs. E. J. Mahler.

Those enjoying a pleasant afternoon in the M. E. Counterman home in Happy last Sunday were Mr. and Mrs. W. R. Franklin of Wayside, Mr. and Mrs. William Payne of Clarendon, Mrs. Ruby O'Neal of Tulia, Mr. and Mrs. J. R. Graham, Brenda, Susan and Reta Ann Fortenberry, all of Amarillo, and Mr. and Mrs. H. F. Harrison and Cindy of Arney and Marvin and Jim Sluder of Happy.

Mrs. R. C. Petty of Goldthwaite is visiting her daughter and family, the Charles Kennedys. Mrs. Petty expects to leave for Alaska by plane to visit her son, Capt. R. C. Petty, and family this week.

Those enjoying a picnic in the park in Amarillo last Sunday were Mr. and Mrs. E. J. Mahler and Cordie, Mr. and Mrs. Glenn Mahler, Kandy and Eddie of near Borger, Mr. and Mrs. Tom Payne, Shelia, Tim and John, Mr. and Mrs. Robert Tusa and Mike, all of Amarillo. Also, Mr. and Mrs. Joyce Lane and Joy of Wayside, Mr. and Mrs. Roy Dodson of Vigo Park and Mr. and Mrs. Cliff Abbott and Celeta of Canyon.

Mrs. Bill Slover of near Quitaque is spending a few days in the Cecil Reed home helping with the children and house work while Mrs. Reed is having dental work done.

Ben Chamberlain of Claude was a dinner guest in the Charles Kennedy home Friday.

WINGS

"Is your family going to be active in society?"

"I suppose so," answered Senator Sorghum. "You can't expect them to deny themselves the same pleasures that they enjoyed at home."

"Will you become a social butterfly yourself?"

"No, I'll keep working hard and try to fly high enough to get into the airplane class."

PROBABLY SO

Thrifty Customer — I want to buy a spur, please.

Saddler — You mean a pair of spurs, don't you?

Thrifty Customer — No, one will be plenty. If I make half of the horse go, the other half will have to go with it.

I GIVE YOU

TEXAS

By BOYCE HOUSE

When I worked on the old Fort Worth Record, one of the paper's photographers was Kayo. No doubt, he had initials or a first name but that's all anybody called him.

Kayo had been a news photographer in Mexico during turbulent times and once took a picture of Pancho Villa. The outlaw chief (or revolutionary — depending on your point of view) had ordered that no pictures be made of him. Kayo was seized and it looked pretty serious but he agreed to destroy the plate, which he did, and he was released. Only, he destroyed another plate and got the real one back to the United States.

Elwood Lloyd, with whom I worked on the Memphis Commercial Appeal, was a world traveler. Among his journalistic achievements was an interview with Father Dutton, successor to Father Damien on the leper island, Molokai.

General Frazier was a desk man on the Commercial Appeal. His title was not military but political —in Tennessee a district attorney is called an attorney general. He was a practicing attorney for years and once defended a man on a charge of having shot four persons to death at one time—got him cleared, too.

Bob Talley, representing the Memphis News-Scimitar, was my rival on the police run. He was in the back seat of a police car with an insane prisoner who suddenly began choking the driver. The other officer fired across Talley, wounding the prisoner and powder-burning Talley's shirt. (Incidentally, the newspaper's business office disallowed a new shirt on his expense account.) Interesting people, newspaper folks.

When you were a child, did you ever hear the expression, "If you can't talk, shake a bush"?

And why is an auctioneer always called "Colonel," never just "Mister"?

UNCLE BENNY

"Do you put your summer clothes away in camphor balls to keep the moths away?"

"No; I usually put them up with three gold balls to keep the wolf away."

MODERN POLITICS

Candidate: "It is my intention to conduct a ~~bunkless~~ campaign."

Publicity Expert: "Swell, brother! And I'm just the man to put that kind of bunk over."

Especially for You...

nylon tricot shadow panel slip by LORRAINE

$3.98

Newly designed with full shadow panel . . . perfect underscoring for the latest arrow-narrow afternoon fashions. High curving bodice takes a generous frosting of luscious nylon sheer with an insert of nylon . . . matching the flash of lace and sheer at the hem. White in sizes 32 to 42.

T. A. BLACK

NEWS LETTER

FROM CONGRESSMAN WALTER ROGERS OF THE 18TH CONGRESSIONAL DISTRICT

What To Do With Surpluses

Yesterday the House of Representatives was considering the proposal to extend the Agricultural Trade Development and Assistance Act of 1954. This is Public Law 480 which was approved on July 10, 1954, as an emergency program for disposing of surplus agricultural commodities through various means calculated to return some permanent benefit to the United States.

The methods of disposal included (1) sale for foreign currency, (2) barter, (3) donation, both domestic and foreign. It was proposed to extend the present authorities in the Act until June 30, 1958.

The law authorizes the President to enter into agreements with friendly nations or organizations of friendly nations for the sale of surplus agricultural commodities for foreign currencies to be used for market development, foreign assistance, settlement of U. S. obligations abroad, and certain other purposes.

The foreign currencies accruing from these sales have been used for market development projects, including marketing studies, exhibits at trade fairs, advertising and promotional displays, and exchange visits of industrial representatives of the United States and the foreign countries from which the foreign currency was obtained. The currencies are also being used in economic development, assistance to American sponsored schools, libraries and community centers, and for economic development loans.

In general, it can be said that the foreign currencies obtained under the provisions of this Act are being used in the furtherance of the foreign aid program, and it might be pointed out in addition thereto. In fact, if you traced some of the foreign aid dollars, you would find that these dollars are given to a particular foreign country by the United States under the foreign aid program.

The country receiving the dollars exchanges them into their own currency, then uses their own currency to purchase agricultural surpluses from the United States. The United States then uses this foreign currency in economic or other development of the foreign country.

The end result being that the U. S. gives the foreign country some money with which to pay for surplus commodities from the U. S. so that the money received in payment for the surplus commodities, which was given to the foreign country in the first place, can be used to develop the foreign country.

This is quite an economic merry-go-round, as you can see. It enables the foreign country to use the American dollars for trade with other countries, yet at the same time, insures the expenditure of an equivalent amount of money for the purchase of foodstuffs to be used in the country and, also, the expenditure of the amount of money representing the value of the foodstuffs in development purposes for that country.

It has been argued that a much simpler process could be devised; that the foodstuffs could be delivered to these nations free of charge. However, if this was done, it would tend to do away with all of the administrative machinery necessary to maintain the economic merry-go-round above referred to.

Many people would lose their government jobs in both this country and the foreign country. It would make bookkeeping operations so simple that everyone could understand them, which is an abhorrent thought to an average bureaucrat.

In fact, a simple direct program could result in an excellent possibility of a measurable reduction in the budget. Such a proposal would bring immediate opposition from the Administration, with warning cries about inflation.

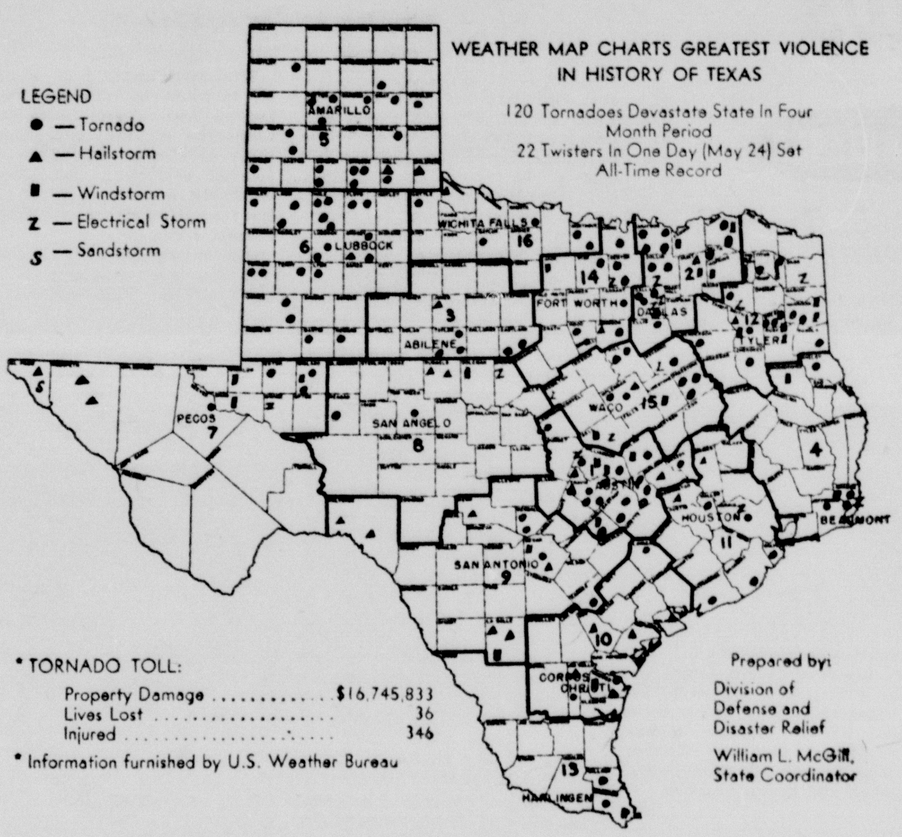
But be that as it may, there is a distinct controversy in this country as to the good or bad of the foreign aid program. My observation is that it would be most difficult to reconcile the clear-cut differences of opinion concerning the foreign aid programs, both direct and indirect.

Nevertheless, the debate concerning Public Law 480 furnished the basis for a most interesting development. The Congresswoman from Missouri, Mrs. Leonor Sullivan, offered an amendment that would authorize the Commodity Credit Corporation, which holds all of these surplus agricultural commodities, to donate to charitable organizations and certain needy persons in the United States, surplus food commodities.

An amendment had been adopted authorizing the donation of raw cotton and cotton products to these people in the United States. However, the discussion on Mrs. Sullivan's amendment became very heated, and Congress, sitting as a Committee of the Whole House on the State of the Union, became deeply involved in all of the complexities concerned with providing foodstuffs to needy foreign nations but denying them to our own people.

After the oratorical smoke had cleared, a vote was taken on Mrs. Sullivan's amendment and the result was 89 yeas and 128 nays. In simple words this meant that the amendment had failed; that this country could and would provide surplus food commodities to be used in foreign nations and would go so far as to ship these commodities to those foreign nations and pay the freight on them, but would not make them available to a needy grandpa or grandma in this country, even if they came to the storehouse for them.

Texas Terrific Weather



Unprecedented floods, tornadoes and severe weather during the first five months of 1957 have taken a property toll in Texas estimated at $91,106,224. The first tornado struck near Harlingen Feb. 16. This was followed by the spring blizzard on March 19. The Dallas tornado was April 2, killing nine persons. A flood in Lampasas on May 12 killed five. The Silverton tornado on May 16 killed 19. And on May 24 an amazing 22 tornadoes churned across the state. The map pinpoints tornadoes, floods and other severe weather in the state this year.

THE QUESTION

The father decided to have a serious talk with young Jimmy, who was inclined to be light-hearted and irresponsible.

"Jimmy," he said, "you're getting to be a big boy and you ought to take things more seriously. Just think — if I died suddenly where would you be?"

"Here," said Jimmy. "The question is where would you be?"

DOMINATING THING

A man looked over a car in an auto salesroom and then was given a demonstration, but did not make a decision. The following day he turned up again and stated that he had decided to buy the car.

"That's fine," said the salesman, pleased at having satisfied his customer. "Now tell me, what was the one dominating thing that made you buy this car?"

The man grinned, "My wife."

MOM'S LOADED

Mrs. Smith, her arms filled with groceries, boarded the bus, followed by her 6-year-old daughter, who carefully dropped the fares into the coin box. "I'm paying the fares today," she explained in a voice that carried to the very back of the bus, "cause Mom is loaded."

TELEPHONE TALK

by W. L. Leavy, Manager

NEW TELEPHONE FOLKS

You'll be seeing Mrs. Margaret Hensley in the business office from now on when you stop in to pay your bill. Mrs. Hensley took Mrs. Bumgarner's place, who has moved to California. She lives at 107 N. 15th with her husband, Hyman, and daughter, Susan.

Jack Williams has recently moved to Canyon from Plainview to work as an installer with the company. Jack and his wife have four little girls and live at 605 9th.

SHE'LL GET YOUR NUMBER

Is your personal list of out-of-town telephone numbers complete and up-to-date?

If it isn't, we'll be glad to get any new numbers you need — free of charge, too. Just call Long Distance and ask the operator for the numbers you want.

As always, you'll find Long Distance service is much faster and more convenient when you *keep a list and call by number.*

Long Distance is a real bargain, too. You can call from Canyon to Amarillo for only 20c (station-to-station, after 6 p. m. and all day Sunday).

I LIKE MY PHONE BECAUSE . . .

If you were asked to name the one "main" reason why you like having a telephone, what would it be?

Time-saver, maybe? Housewives, especially, get so much more done during the day by using their telephone as an errand boy.

Business aid? The phone is an essential tool for most business and professional people.

Companion? Folks who have to stay close to home because of illness or family responsibilities find the telephone a reliable friend. Frequently, it's their number one means of keeping up with friends they don't often get to see.

Others find it reassuring just to have a telephone close by, knowing they can use it to call for help in an emergency.

But most of us, I imagine, like having a telephone simply because it's an easy, pleasant way to visit the people we enjoy and want to talk to.

Telephone service means a lot of different things to a lot of different people. For whatever reasons you like having a phone, you can be sure we're always searching for new and better ways to make it even more useful, convenient, and economical.

Call by number. It's twice as fast.

WASHINGTON NEWSLETTER

from Sen. Lyndon Johnson

Texas has taken the lead in building highways under the Federal Aid Highway Act of 1956, which became law just a year ago. Less than two months after the President signed the highway bill enacted by the 84th Congress, the Texas Highway Department received bids on the first Texas contract under the program.

Today, 267 miles of superhighways are under construction or soon will be under construction in Texas. Bids are now being asked for construction of 278 miles more.

Texas will receive some $270 million of Federal funds in the next three years to build and improve the State's section of the Interstate System. In addition, Texas will get about $122 million to spend on primary, secondary and urban road systems. Over the next 13 years, it is estimated that more than $2 billion in Federal highway aid will be received by our State.

Future growth of Texas will be vitally affected by this vast highway construction program. Economic benefits of the program will spread out widely. I consider the Highway Act one of the most progressive pieces of legislation enacted by Congress since I became a member of the House of Representatives 20 years ago.

Drouth and floods have cost Texas heavily. It is estimated that the last five years of the drouth cost the State's farm interests $2.7 billion. Property damage done by the spring floods approximated $70 million. In addition, Texas lost some 25 million acre-feet of water into the Gulf of Mexico. Value of the topsoil washed away is incalculable.

An effective water development program would have prevented much of the loss. We have lagged behind in the construction of necessary flood control and water projects. Last week, in a series of Senate speeches, I presented the facts about the kind of program we need and urged action during this session to get the program well started.

Excessive imports of foreign oil threaten to ruin our Texas independent oil producers. Since reopening of the Suez Canal, their production has been cut 700,000 barrels a day. Meanwhile, oil imports have reached the staggering figure of 1,700,000 barrels a day.

The national security is threatened by this situation. I have called on the President to take action—which Congress gave him authority to do—to reduce imports. I am assured action is under way.

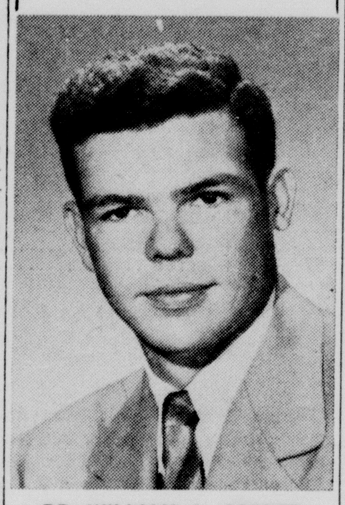
Professor



DR. WILLIAM A. COOPER
★ ★ ★

Biology Teacher Joins WT Faculty

Dr. William A. Cooper Jr., who received his Ph.D. in May, has been appointed associate professor of biology for the 1957-58 session at West Texas State College.

Dr. Cooper, a native of Archer City, earned his Ph.D. at Texas A & M College, where he has been an instructor for the past two years. He received his B.S. and M.S. degrees at North Texas State College.

A graduate assistant for a year at Texas A & M, Dr. Cooper has also been an instructor in biology and natural sciences at North Texas State and Paris Junior College.

He was a fisheries research assistant for the Silvey Foundation at the NTSC Station for a year, and was a seismograph operator for a year with the Continental Oil Company.

Dr. Cooper, who served during World War II and the Korean conflict with the USNR Hospital Corps, is a member of Beta Beta Beta, national biological fraternity, Society of the Sigma Xi, national research society, and the Texas Academy of Science.

He is married and has a daughter, Viki, 4, and a son, William A. III, 16 months.

PROMPTLY

"And now," beamed the business school teacher, "tell the class what you do when your employer rings for someone to take dictation."

"I pick up my notebook," recited bright little Miss Hastings, "sharpen my pencils and answer the buzzard promptly."

Specialists Give Newlyweds Tips On Buying First Home Furnishings

COLLEGE STATION—Ever stop to think how much money newlyweds invest in home furnishings — especially furniture? Or how many times a costly suite or piece of furniture chosen in a hurry, turns out to be a "white elephant?"

Selection of furniture reflects taste and judgment as well as a financial investment, according to extension home furnishing specialists . . . careful choice will pay dividends in savings and satisfaction.

Keynote of today's furniture is comfort, simplicity, flexibility and usefulness. It is designed to meet changing needs of many families on the move, and is scaled to the dimensions of today's home.

Newlyweds may be confused by all the possibilities and wonder where to spend and where to save on furniture.

Specialists suggest spending as heavily as possible on such items as a sofa bed, spring and mattress and lounge chair. These are necessities and long term investments. Buy good permanent storage units, such as chests of drawers which can be used anywhere in the house.

Favor open stock rather than whole suites of furniture. It is often smarter to buy separate pieces that look well together, yet have a personality of their own, than to buy two or three piece sets.

Choose design carefully. Comfort is not a matter of the size and amount of upholstery, but one of clever design. Look for graceful, simple lines and good construction. Consider care and upkeep.

Furniture should be appropriate to your way of living. The furnishings should have the same general feeling so that they will be appropriate to each other in design, texture and color. You can assemble pieces of any period in one room, or you can combine light and dark finished woods — just be sure to let one period and one finish dominate.

BITTER MEMORY

In a discussion on women's styles on a radio quiz show, an elderly man was one of the contestants. He was asked: "I suppose you are old enough to remember wasp waists?"

"Remember 'em," he exclaimed bitterly. "That's when I got stung!"

By VERN SANFORD
Texas Press Association

Water legislation promises to be a lively topic at the special session of the legislature in October.

Gov. Price Daniel has announced he will urge creation of a statewide water agency empowered to negotiate with federal authorities in financing reservoirs.

That is likely to prove controversial in itself. Then there is likelihood of considerable discussion over the State Board of Water Engineers and its recent troubles. Fuses get lit that way.

Former State Sen. Joe Carter resigned as the Board's general counsel. Board dissention erupted into public view at a meeting called by Chairman R. M. Dixon to demand Carter's resignation. Member Otha Dent, in support of Carter, avoided attending the meeting and no action was taken.

Dixon accused Carter of being "disloyal" and working against his confirmation in the Senate. But Dent indicated Carter wasn't the main reason for Board dissention and his leaving doesn't mean Board harmony.

Carter remained non-commital.

Insurance Board Changes

New Insurance Board Chairman Penn Jackson took over duties earlier than planned last week after a snarl developed in the new reorganization law.

Atty. Gen. Will Wilson ruled that the Board cannot legally function without employing a newly-authorized commissioner. But there is no money to pay him until Sept. 1.

Gov. Daniel decided to accept resignations of the outgoing Board members immediately. Jackson took office. Hold-over appointee Joe Gibbs remained. Third member, Dave Irons, will join shortly. Together they will try to untangle the knot and launch a new era in insurance regulation.

One-Third Coming Back

U. S. Trust victims can expect to get back a little more than 33 cents on the dollar.

State Liquidator J. D. Wheeler says there will be $2,449,221 for distribution to creditors after suits by claimants are settled. Approved claims total $7,292,385.

Litigation by a group of claimants seeking priority is still pending on appeal.

Meanwhile, Gov. Daniel has asked federal authorities to use Ben Jack Cage to Texas for trial. diplomatic channels to return Cage faces theft and embezzlement charges, involving a half million dollars, in connection with the collapsed iCT Insurance Co. He is reportedly in Brazil where he has extradition immunity.

Oil Cut-Back Lashed

Texas' biggest slash ever in oil allowable ruffled up the dander of independent oil men.

July allowable was scissored 390,449 barrels a day by the Railroad Commission in an effort to cope with increased imports and excessive stocks.

Four associations of independents fired telegrams to Washington. They urged immediate steps in Congress to cut imports. They said the slash puts national security at the mercy of unreliable foreign oil supplies.

No blame was aimed at the Railroad Commissioners. Independents said the officials were "compelled" to order the cut.

Farm Prospects Brighten

Let-up in rains has sent farmers scurrying back to the fields in hope of making some late crops after all.

Agriculture Commissioner John White granted a third emergency extension of the cotton planting deadline in 44 Central and East Texas counties. July 1 is the new cut-off date.

Intensification of insect control programs was urged in view of the deadline extension.

Livestock and ranges are reported in good to excellent condition as far west as the Pecos. But fly and other pest problems were widespread and serious.

Anti-Blooper Plan Urged

So many legislative bloopers are turning up that lawmakers are beginning to look for some way to prevent recurrence.

One proposal is for the Legislative Council to screen all bills coming before committee, especially conference committees where final writing is done.

It took an attorney general's opinion to decide that a pension could be paid this summer to Texas' only surviving Confederate veteran, Walter Williams. Legislative action wasn't clear.

Insurance reorganization was snarled again when it was discovered that the new law required employment of a Commissioner but his salary doesn't start until Sept. 1.

Typographical errors resulted in incorrect appropriations in several instances.

Granddaddy of the bunch was a botch in the school fund diversion bill. Unclear is whether it transfers $8,000,000 or $12,000,000.

There were numerous smaller errors too.

Daniel Lists Holdings

Even though he first said he did not need to file a code of ethics statement, Gov. Daniel has listed his outside investments under the new ethics law.

His holdings: two mutual life insurance policies, a fraternal life insurance policy, an accidental death insurance policy, and a one-third ownership in the Trinity Publishing Co., Inc., of Liberty.

Politics Astir Again

Push is under way by two rival Democratic forces for control of Texas party machinery next year.

Employment of J. J. (Jake) Pickle to head up a grassroots drive for the State Democratic Executive Committee was announced last week. Pickle was a key worker in Gov. Daniel's campaign and is well known as a political organizer.

Liberal rivals, the Democrats of Texas, gave notice of combat weeks ago. They are busy with precinct-by-precinct organizing.

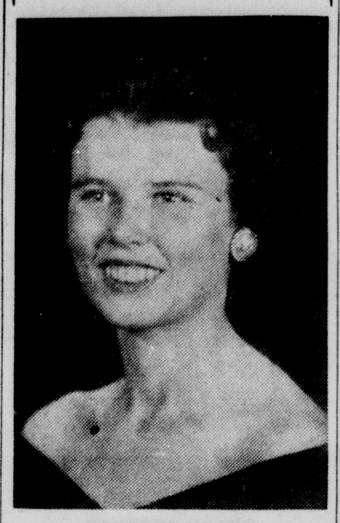
Short Snorts

Charles K. Devall, Kilgore publisher, re-elected president of Texas Good Roads Assn., urged "intensive public attention and interest" in Texas' highway plans. He viewed it as necessary to a sound highway program "essential to the long-term growth of the Texas economy."

In a personal visit to the nation's capital, Governor Daniel asked curtailment of excessive oil imports. He decried a controversial section of a natural gas bill that would invoke restrictions against state and local price regulation. He plugged for more money for Texas river surveys. And he called on the State Department to push efforts to return Ben Jack Cage to Texas for trial.

State Sen. Ottis Lock of Lufkin has announced plans to retire from the legislature at the end of his current term. He will become assistant to the president of Southland Paper Mills in Lufkin.

Betrothed



DOLORES MEGEE

Mr. and Mrs. E. W. Megee of Dalhart are announcing the engagement and approaching marriage of their daughter, Dolores Nell Megee, to Louis L. Clark, son of Mr. and Mrs. C. C. Clark of Lubbock. Wedding vows will be exchanged Aug. 10 at the Joseph A. Hill Chapel.

Visitors this weekend in the home of Mrs. W. E. Lockhart were her sons, Dr. W. E. Lockhart Jr. of Alpine, and Lt. Col. Vincent Lockhart of Washington, D. C., and their families. Colonel Lockhart is now with the Office of the Secretary of Defense, but expects to go into the Foreign Service of the State Department this fall and be assigned to Dhahran, Saudi Arabia.

Mrs. Mary Parker left Wednesday for Kickapoo Camp to visit for three days and to get her daughter, Rose Ellen. They will go to San Antonio and then will go to New Braunfels to the factory to do fall shopping for Dan's Store.

Ragle Attends Annual Texas Pastor School

The Rev. H. Doyle Ragle, pastor of the First Methodist Church, was among the 350 attending the 57th annual Texas Pastor's School held at Southwestern University in Georgetown last week.

The meeting was sponsored by the Board of Education of the Methodist church. Lecturers included Bishop Eugene M. Frank, resident bishop of the Missouri area, Dr. John Paterson, professor at Drew Theological Seminary, Dr. Merrimon Cuninggim, dean of Perkins School of Theology at SMU, Bishop A. Frank Smith of Houston, resident bishop of the San Antonio-Houston area, and Bishop William C. Martin of Dallas, resident bishop of the Dallas-Fort Worth area.

ELECTRICITY BRINGS
THE PASTURE TO THE COW

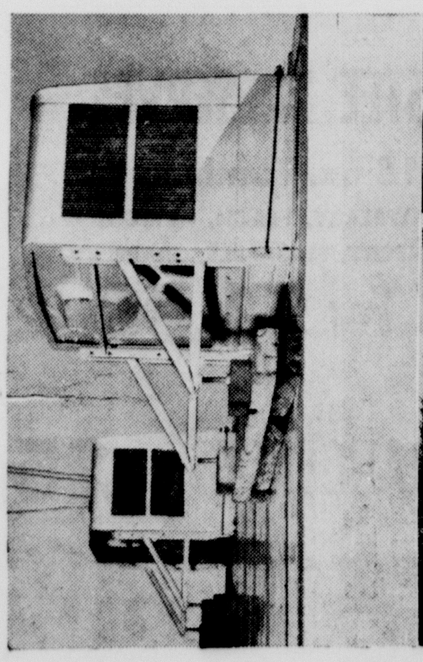
Fantastic, No! Latest innovation of the application of electric power actually brings the pasture to the cow, and dairymen in many sections of Texas are using the machine for supplemental feeding. The magic equipment is a cereal grain "incubator" which grows grass 6 to 8 inches in six days.

Secret of the installation, called a Herbagere machine, is in the use of electric heat pumps for accurate temperature control and a practical application of hydroponics. Hydroponics is the cultivation of plants by placing the roots in liquid nutrient rather than in soil.

The cereal grains are presoaked, allowed to drain, then put in trays and racked like a file cabinet. With proper control of heat, humidity, light, and chemically treated water, seeds are sprouted and a phenomenal growth is completed in six days.

The experience of dairymen using this machine has shown that 20 pounds per day per cow will increase milk production from 10 to 20 percent and butterfat content 2 to 3 points. Cost of the forage has been from $8 to $12 per ton. Annual production in a 40 cow unit equals that of 80 acres of farm land, the plantings are spaced to yield 800 pounds of forage daily.

Blankenship Dairy, Amarillo, is putting a 12 by 20 foot machine through its paces at this time. This machine has 120 trays with 5 grain baskets per tray; it produces grass for 40 head and will produce over 140 tons of grass per year.



Heat and circulation is controlled by units attached to sides of incubator building. These units have whipped the mold problem which plagued the earlier models of the machine.

Mr. A. O. Blankenship, Blankenship Dairy, Amarillo, inspects a crop of five day old oat grass. Lower left, two baskets show grass and root development after 6 days of growth.

A NEW HIGH IN PERFORMANCE!
Higher octane! Higher power! A new gasoline that brings out the best in today's more powerful engines!

Phillips 66 Announces a New Higher Performance FLITE-FUEL

Phillips 66

Now Phillips *66* brings you its new FLITE-FUEL with the higher octane and higher power you need to get peak performance out of any car. Not only new cars, but older cars, too, will benefit from the remarkable performance qualities of this higher-powered FLITE-FUEL. It's blended for *local driving conditions*. It's the only gasoline containing added *Di-isopropyl*. It has extra high octane for smoothness and long mileage. It's clean burning, so it needs no anti-fouling additive. Fill up with new FLITE-FUEL at your Phillips *66* Dealer's and discover a *new high in performance!*

PHILLIPS PETROLEUM COMPANY

Here's What The Cows Want — Food and Relief Via a Milking Machine

With the dairy industry bringing more than $5 million a year to Randall County, dairy farmers in the area are moving to more effecient ways of producing milk. This milking parlor, and it is a parlor, is located on the Bill Patke farm north of Canyon. The cows walk up an incline from the cow lot to the milking level of the whitewashed parlor and enter two at a time. The two fill empty stalls located about three feet above ground level, and the milker attaches the suction cups of a milk machine after washing the cows' bags. They eat while being milked. The milk runs through a clear plastic tube into another room, which is screened, fly-proof and spotlessly clean. The tubing changes into stainless steel and the milk flows into a stainless steel refrigerated tank. On the wall of the fly-proof room is a series of plugs and hoses that are used to wash and flush the entire milking system. Most of the other modern milking parlors in the county use similiar systems, where the milk is never touched by humans. The closest that hands come to the milk is when the milker washes the cows' bags with water.

SOIL CONSERVATION DISTRICT NEWS

OUR SOIL ★ OUR STRENGTH

If our soils are to remain highly productive a good environment must be provided and maintained. A good environment requires that soil, air and water be in balance.

Soil permeability is that quality of the soil that enables it to transmit water and air.

In soils that are not well drained, excess water fills the pore spaces and crowds out the air, causing the plants to stop growth or die from lack of air.

Also wet soils cause the structure to become massive and more slowly permeable. Deep rooted crops, drying and time are required to rebuild this structure.

Compact layers within the soil which are sometimes caused by plowing or cultivation to uniform depths will slow down the movement of water and air through the soil.

Good soil permeability will do no good if the surface soil becomes puddled or runs together, causing the water to run off instead of going into the ground.

To maintain a high infiltration rate growing crops, stubble mulching, or crops residues must be on the land.

☆ ☆ ☆

The technicians of the Soil Conservation Service assisting the Randall-Potter Soil Conservation District have helped the following farmers apply practices on their farms:

Jacky Meeks, 3832 feet pipeline; R. E. Bryan, 1000 feet pipeline; Harold Bryan, 1326 feet pipeline; Homer C. Bryan, 282 feet pipeline; David Horn, 2592 feet pipeline; C. B. Rittenberry, 2844 feet pipeline; and Edward Wieck, 2175 feet pipeline.

These underground pipeline systems will conserve water and labor. It has been proved that over a period of five years the pipeline will save enough water to pay for the pipe and installation.

The ease and convenience and amount of labor saved would make the underground system very desirable.

"Soil and water are the very foundation of our agriculture and of our whole nation. It is therefore the responsibility of every American — every individual and every group — to work together to see that these resources are used wisely, and protected for the use of generations that will follow."

Clinton P. Anderson, former Secretary of Agriculture

Belt Making Is Demonstrated

The Home Demonstration agent, Mrs. Mona Hildreth, showed the Umbarger 4-H girls June 18 how to make a belt and explained to the younger members how to hem and stamp cup towels. How to put on belt hooks was reviewed.

Beatrice Wieck, 4-H camp delegate, made a report concerning the roundup at College Station.

The group was reminded to enter the bake show. Present at this meeting in the Sylvester Batenhorst home were 13 members, three visitors, and the two adult leaders, Mrs. Alvin Friemel and Mrs. Max Hoffman. A new member, Lola Buckholz, was also present.

The next meeting will be in the Albracht home July 15.

Mr. and Mrs. T. E. Allen of San Antonio, Mr. and Mrs. Max Allen of Austin and Mrs. Stan Hall of Los Angeles are visiting with Mrs. C. O. Cooper and Faye Cannedy.

Fame is not as awesome as it once was.

Through newspaper stories about the great and near-great, we learn how many children each noted person has, his pet dog's name, the endearing terms he applies to his wife, how many divorces he has been through.

Picture magazines, radio and television interviews add more intimate knowledge. And with all this, we tend to look on famous persons as oddities rather than as great men — to feel amused by them rather than inspired.

It was with some surprise that we witnessed real greatness in action a few weeks ago. One of the world's best known living pianists, Artur Rubenstein, touring the Southwest, was booked for a concert in this college town.

As he walked out on the huge stage of the city's new auditorium, he seemed a little old man; nothing more. The great gray curtain behind him, the huge concert grand in the center of the stage, the vastness of the empty orchestra pit, the large restless audience out beyond — altogether he seemed pitted against hopeless odds.

He sat down at the piano and waited for silence. Presently, he began to play. It was Bach; then Beethoven; then Schumann and Chopin — music to impress rather than to entertain the average uninformed listener. But as he moved through those difficult numbers, his nimble, sensitive fingers made them vital and meaningful. He had lifted the curious above their own level of musical understanding. The applause was warm and genuine! He sensed that, too, and among us we had a wonderful evening.

True greatness needs no advance build-up, rarely makes itself felt through pomp and arrogance. Real fame is earned excellence, achieved by hard work. It is expressed through simplicity and dignity; and sincere response to those whom it inspires.

Leo Rigsby Wins A&M Scholarship

Leo C. Rigsby, son of Mr. and Mrs. R. R. Rigsby, has been awarded a four-year opportunity award scholarship at Texas A&M. Rigsby, who plans to major in engineering, will receive $250 each year.

One opportunity scholarship is awarded to a promising student in each county in Texas. Recipients of the scholarships are selected on the basis of degree of need of financial assistance, high school record, aptitude test score, leadership qualities, character and completeness of application.

After finishing his job this summer at Eugene, Ore., with the Southern Pacific Railroad, Rigsby will enroll at Texas A&M.

After a month's visit, Jan and Mike Condron, who have been visiting with their grandparents, Mr. and Mrs. J. R. LaFon, and their aunt, Mrs. Hugh Currie, on the Currie ranch, have returned to their home in Waco.

Raillard Takes Over As Rotary President

A challenge to "achieve the best year yet" was given Canyon Rotary Club members Tuesday by new president, Raymond Raillard, as he assumed his office.

Two other club officers assumed duties Tuesday for the new year. They are Paul Summers, secretary, and Guy Harp, new treasurer. Luther Hagard is program chairman.

Raillard outlined the "Object of Rotary," urging the emphasis of the four avenues of Rotary service during his year of tenure.

The four avenues to be given "equal attention" are vocational, community, club and international service.

Visiting Rotarians were Bob Lindsey Sr. of Borger, Claude Dillehay of Bonham, J. R. Johnson, Lloyd Widdifield, and Earl Phillips, all of Hereford, and Basil Walker Jr. of Amarillo.

Guests of club members were Joseph Findley, guest of G. W. Webb; Col. Edward Dreiss, guest of E. E. Plank; W. M. Teague, guest of Jerry LaGrone; and Ed Clark, guest of Frank Kimbrough.

Combs Report Trip To Padre Island

Mr. and Mrs. G. B. Combs went with the C. V. Lowes of Gruver to visit Comb's daughter and son-in-law, Mr. and Mrs. C. A. Barker. The couples also visited Mrs. Comb's daughter, Mrs. G. Bourianoffs.

Mrs. Combs reported they enjoyed visiting Padre Island where they fished, swam and had a picnic dinner.

On Saturday, the Lowes' daughter and her family, the Sonny McRutchens, from Dallas, joined the group.

Mr. and Mrs. C. H. Dillehay of Bonham and Mrs. Mario Arteaga and daughter, Mandy, of Cuba are visiting in the home of Dr. and Mrs. L. F. Sheffy and Miss Campbell.

Wheat Load

Jack Vincent and Ernest Prichard unload one of the first loads of wheat brought into Canyon this season. The Vincent wheat was brought to Farmers Elevator June 24, while Leonard Winters brought a load to Consumers Elevator June 20.

Mrs. Helen Vaughan of Mangum, Okla., is visiting her daughter and family, the Bill Brundiges.

Mr. and Mrs. J. T. Kimmons of Alamagorda, N. M., arrived Tuesday night to visit a few days in the home of her brother and family, Mr. and Mrs. Bill Brundige.

Scouts- -

(Continued from Page 1)

ness, during which time they will rely on their scouting training and woodsman skills to take care of themselves.

After returning to the canoe base on Saturday, July 20, the boys will clean up their equipment and return on their chartered bus, arriving in Amarillo on Tuesday, July 23.

Harry Delashmutt of Amarillo will be the adult leader of the Canyon crew. The boys going in the Canyon crew are Larry Brotherton, Charles Nester, Craig Hinger, Roy Harris, Neal Lemmons, Malcolm Carter, Don Cloward, Bill Cornette, David Arnold and James Young.

Mr. and Mrs. J. W. Atkins and son, Richard, of Big Springs visited Sunday, Monday and Tuesday with the G. B. Combs. The Atkins left Tuesday noon for Anadarko, Okla., to visit a daughter and her family, the Aca Jenkins.

REV. ALLAN BROCKWAY

★ ★ ★

New Methodist Director Named

A new director of the Methodist Student Center at West Texas State College has assumed duties. He is the Rev. Allan Brockway, a recent graduate of Southern Methodist University.

Married, the Rev. Brockway earned his B.D. degree in May from SMU's Perkins School of Theology. He also holds the B.A. degree from Hendrix College in Conway, Ark.

A graduate of Fayetteville, Ark., High School, Brockway was pastor last year of the Wesley Methodist Church in Bryan. He served two years as associate youth director of the Highland Park Methodist Church in Dallas.

Brockway was a member of Alpha Psi Omega, dramatics fraternity, and Phi Mu Alpha, music fraternity, at Hendrix College. He is the son of Mr. and Mrs. H. A. Brockway of Fayetteville.

Mr. and Mrs. Omar Hensley of LaCross, Kan., visited recently his sister, Mrs. Carl Hizer.

Highland HD Has Ice Cream Party

Members of the Highland Home Demonstration Club, their families and guests were entertained with an ice cream party at the home of the L. T. Campbells June 26.

Bob Roseberry, Potter County Civil Defense director, was guest speaker.

Carolyn Campbell was hostess for the 4-H girls. Games of parchessi, checkers and baseball were played by the younger girls, and the older ones visited.

About 40 people attended the party.

In Test

CPL. FRANK A. LILL

Canyon Marine in Atomic Exercise

Marine Cpl. Frank A. Lill, son of Mr. and Mrs. John F. Lill, is taking part in the first extensive troop exercise in the current series of atomic tests at Camp Desert Rock near the Atomic Energy Commission's Nevada Test Site.

The 4th Marine Corps Provisional Atomic Exercise Brigade will conduct the exercise in connection with a series of comparatively low-yield tests being held by the AEC and Department of Defense. The mobile brigade will move into a rapid assault against an imaginary occupation force after the enemy has been hit with an atomic explosion.

Part of the brigade will drop on the enemy position by helicopter. The airborne Leathernecks will then join up with Marines who will move in on the objective in amphibious tractors.

The brigade is using the tests to train Marines in physical protection measures and to instruct them in the effects of atomic explosions on clothing and equipment.

Umbarger News

Mr. and Mrs. Lewie Raef and family visited Sunday evening in the home of Frank Grabber.

Mr. and Mrs. Raymond Batenhorst and family visited with Mr. and Mrs. Ben Koch.

Mr. and Mrs. Ben Buecker spent Sunday evening with Mrs. Carrie Beckman.

Mr. and Mrs. Math Albracht and family visited relatives in Nazareth.

Mr. and Mrs. Albert Fischbacher and family visited in the Harry Brorman home.

The Umbarger Blue Sox defeated the Nazareth team Sunday. The final score was 13-9.

Mrs. John Jennings Is T&C Hostess

Mrs. John Jennings was hostess to the Town and Country Club Thursday afternoon. Mrs. Betty Thomas and daughter, Susann, of Albuquerque, N. M., were guests. Ten members were present.

Wesley Weller Dies In Pueblo

Wesley L. Weller, 69, of Canon City, Colo., and a former resident of Canyon, died June 26 in a Pueblo, Colo., hospital.

Weller, who was a retired line foreman for Southern Colorado Power Co., had been an employee of the company for 40 years, taving a job with the concern when he moved to Canon City in 1915.

He was born January 11, 1888, in Bates County, Mo., and moved to Colorado in the early 1900s. He married Mae Williams in Canon City on June 6, 1917.

Surviving him are his wife, one daughter, Mrs. Betty Jean Sears of Baltimore, Md., and two grandchildren, Arthur W. and David A. Sears, also of Baltimore. Both of his sisters, Mrs. Effie Cofer and Grace Weller, live here, and a brother, Benjamin, lives in Magdadena, N. M.

Mrs. Cofer, Miss Weller, and Ben Weller of Magdalena, N. M., a nephew, attended the funeral together. Last rites were read Friday in the Canon City First Baptist Church. Masonic graveside services were held, and there was a Knight Templar escort at the services.

Interment was at Lakeside cemetery under the direction of the Wilson mortuary.

STINKS!

A drunk lying on the floor of a bar began to show signs of life, so one of the customers smeared a little limburger cheese on his upper lip.

The drunk arose, slowly and walked out the door. In a few minutes he came back in. Then he went out again only to return in a few minutes.

Shaking his head with disgust, he said: "It's no use, the whole world stinks."

Ronald Hillier Gets Special Recognition

Ronald Lee Hillier, son of Mr. and Mrs. R. C. Hillier of 111 Tennessee, one of 40 young men working toward Air Force wings, has been recognized by the President of the United States for "Outstanding Achievement."

Because of this, Hillier has been awarded the rank of second lieutenant with a regular commission in the Air Force. A 1951 graduate of Amarillo High School, Hillier will receive his navigator wings at Ellington AFB in Houston July 8.

Hillier received a B.S. degree in engineering from Texas Tech in 1956. He is married and has one daughter.

His high record enabled him to make his choice of overseas assignment and he chose Germany. He will be there three years.

Mr. and Mrs. R. C. Hillier, of Amarillo, parents of Ronnie, will be present at the commission exercises. Ronnie attended schools in Canyon.

Mary Patricia Haley left Saturday with Mr. and Mrs. Lane Cummings and daughter, Carole, of Amarillo, for Seligman, Ariz., to visit her grandparents, Mr. and Mrs. Arthur C. Haley Sr.

Cousins Visit With Mrs. Ida Schuette

Arnold Vahldick of Forest Park, Ill., and Charles Vahldick of Brighton Park, Ill., visited last week their cousin, Mrs. Ida Schuette.

The Vahldicks also attended a barbecue supper at Mrs. Schuette's home. Others present were Mr. and Mrs. Travis Knod, Mr. and Mrs. Victor Mueller, Mr. and Mrs. Richard Stevens and Cynthia, Mr. and Mrs. William F. Schuette, David and Marilyn and Oscar Schuette.

Arnold and Charles Vahldick left Saturday by plane for Illinois.

Cherry Blossoms

By DOVIE CHERRY

Unless you've had your head in an ostrich hole, you know that Thursday is July 4. There's one thing about this holiday. You can hear it coming.

☆ ☆ ☆

Fireworks, we must admit, can be quite noisy and dangerous . . . but quite spectacular.

No matter how much parents, especially mothers, and city officials object, it's a pretty sure bet that fireworks will be with us for a long time to come.

Fireworks have been a part of celebrations for much longer than most people realize. In fact, I discovered by reading Aramco World, a monthly magazine, which never fails to discuss a tradition that fireworks have an interesting history.

To Americans, fireworks are associated with the Fourth of July or Christmas. But how about other countries? In England the big fireworks day is Guy Fawkes Day, Nov. 5.

Easter Saturday is a day for brilliant fireworks display in Florence, marking the end of Lent and the beginning of a joyous new season . . . Tokyo inhabitants have a "bang-up" time on their "River Festival" . . . China and India celebrate with fireworks on almost any event from a birth to a funeral.

And it all started . . . as Armaco says, "The art of pyrotechny was born, in all likelihood, somewhere in the vast interior of Asia, in a region where the salt necessary for existence was available only in the form of saltpeter. One day a prehistoric firemaker, probably Chinese, discovered that the saltpeter he used in cooking made excellent tinder when mixed with charcoal from his fire. The tinder sparkled. This was the beginning of pyrotechny."

Rockets are the most complicated of the various fireworks to construct. The mixture is pressed into a tube of strong paper and when ignited, the mixture throws out a jet of fire.

Then the recoil produced by the jet sends the tube into the sky. The stick attached to the rocket is for balance. The starburst, great sparkle or whatever the rocket features is caused by the burning mixture contacting with the fuse that ignites the head.

Fireworks caused a great deal of alarm for the first spectators and they can still cause alarm when unexpected. This year at the World Trade Fair in New York the Japanese marked the opening with a fanfare of brilliant fireworks on the Hudson. Those who were unaware of what was taking place kept authorities busy explaining that no one was really attacking Manhattan.

☆ ☆ ☆

The best place to be July 4 is home wiggling your toes in front of an air conditioner.

☆ ☆ ☆

The weather that is supposed to escort July 4 didn't wait for its partner this year. This 100 degree and above weather has made the swimming pool the most popular spot in town.

☆ ☆ ☆

And speaking of swimming, a rather large number of women are interested in becoming water-born. The swimming class for women at the city pool is a great success. According to one unofficial report, there were at least 60 women at the second lesson.

☆ ☆ ☆

If one of the grade school teachers could have heard the remark made by Lou Cowart, daughter of Mr. and Mrs. Pete Cowart, she would probably feel glad clear to her toes that she is a teacher.

When asking if she was enjoying her summer, Lou said, "Yes, but I sure am missing my teacher. She was the nicest teacher I've ever had."

☆ ☆ ☆

Seems as if I have history on the mind, but here's a little more.

I was talking to Mrs. Jeannette Robbins the other day and she pointed out for me the site of the first Canyon home. According to Mrs. Robbins, the first home, the Conner home, was located on what is now the corner of 16th Street and Ninth Avenue.

There are two slim trees there which Mrs. Robbins believes are the trees which were there when the Conners lived at that site. The first Canyon post office, Mrs. Robbins has been told, was located just about where her house now stands—1508 Eighth Avenue.

☆ ☆ ☆

If I were in the award presentation business my award for bravery would go to the fellow who disarms an atomic bomb that failed to go off.

Howard Henderson of Waco, Mr. and Mrs. Charles Fain and daughter, Joyce, of Pico, and Mr. and Mrs. Ray Schultz and children of Dumas visited in the T. W. Henderson home last week.

Wayne Wirt returned home Sunday after attending the Jaycees' convention in Milwaukee, Wis., last week.

Home Ceremony

MRS. GENE DOUGLAS COLLIER

☆ ☆ ☆

Annie Jean Howard, Gene Collier Exchange Nuptial Vows Recently

Nuptial vows were solemnized recently for Annie Jean Howard, daughter of Mr. and Mrs. Charlie Howard, and Gene Douglas Collier, son of Mr. and Mrs. Truitt Collier, in the home of Mr. and Mrs. M. W. Hicks. The Rev. Henry Eason, pastor of the Industrial City Baptist Church of Amarillo, read the double-ring service.

Sue Reynolds, pianist, played traditional wedding marches and accompanied James Grantham, who sang "Always" and "Because."

Attending her sister as matron-of-honor, Mrs. Shirley Smith wore a light green, nylon lace, floor-length dress with white hat and gloves and carried a nosegay of yellow daisies.

As flower girl, Donna Kay Smith, niece of the bride, and Linda Dianne Hicks, cousin of the bride, wore yellow, nylon lace, floor-length dresses with white flower headdresses and carried white carnation nosegays with yellow streamers.

Virginia Ann Collier, sister of the bridegroom, was ring bearer. She carried the rings on a white satin pillow and was dressed as a miniature bride.

Jack Collier, cousin of the bridegroom, was best man.

Given in marriage by her father, the bride was attired in a formal length gown of white satin covered with lace and tulle. The gown was styled with a sweetheart neckline with fitted bodice and long tapered sleeves. Her fingertip veil of tulle was attached to a white lace headpiece, and her bouquet was white rosebuds on a white Bible.

Mrs. Howard, mother of the bride, wore a pink dress with black accessories. Mrs. Collier, mother of the bridegroom, wore a navy suit dress with white accessories. Both had white carnation corsages.

Following the ceremony, a reception was held feting the bridal party and guests. Jane Collier served the two-tiered cake from a table laid with a lace cloth over white. Mrs. Roy Greer presided at the punch bowl.

The bride graduated from Canyon High School in May. The bridegroom, a graduate of Happy High School, is employed with the Texas Highway Department.

For a trip to Mexico, the bride wore a tan sheath dress with white accessories and a white rosebud corsage. The couple will live in Canyon.

Mr. and Mrs. Worth Jennings and daughter, Kay, are visiting in Phoenix, Ariz., with their daughter and family, Mr. and Mrs. Bill Eikner and boys.

Fairview Breezes

Coleen Schaeffer has been suffering from sleeping sickness. It was only a light case.

Quite a few chickens have died from heat. G. E. Wesley reports losing 15 Sunday.

Brother Billie Jo Hall filled his regular appointment at our church Sunday. We were glad to welcome Mr. and Mrs. Oscar Read and James out to church Sunday.

Mr. and Mrs. Don Stoneberg of Fort Worth are expected in the Frank Rogers home Tuesday. Their son, Gary and Mike, have been visiting their grandparents, Mr. and Mrs. Frank Rogers, the past month.

Mr. and Mrs. E. E. Wesley and Susie of Littlefield visited Sunday in the paternal J. W. Wesley home.

Darla Ann Whitson and Paula Davis are visiting this week with Darla's grandparents, the J. W. Wesleys.

Mrs. Serena Bryan is still quite ill in Neblett Hospital.

Mrs. Woodrow Wesley visited Thursday with Mrs. Bryan.

Mrs. J. W. Wesley visited Friday and Mrs. John Patterson visited Saturday with Mrs. Bryan.

Nan Earyle Shipman is visiting this week with Rhoda Williams of Hereford.

LaQuita Patterson visited the paternal John Patterson home over the weekend.

Mr. and Mrs. F. O. Amerson and Lavena Amerson visited Sunday evening with Mr. and Mrs. Don L. Amerson in Amarillo.

Mr. and Mrs. Glen Ingram, Mrs. Mittie Wann and Mrs. Frances Domser left for their homes in California after spending two weeks visiting relatives in this vicinity.

Mrs. Earl Wesley was ill Sunday.

Mrs. Lockhart Is Hostess for Family

Col. and Mrs. V. M. Lockhart and son, Billy, Dr. W. E. Lockhart, and son, Billy, and daughter, Mary Bell, and Mrs. G. W. Pettitt and sons, Eddie and Johnny Mike, attended a family reunion in the home of Mrs. W. E. Lockhart Sr. Unable to attend was Mrs. C. W. Mays, who is recovering from an operation at Ft. Sam Houston.

E. A. Oberst Sr. returned Sunday from Falls City, Neb., where he attended the funeral of his brother, Sam.

Mrs. John Lill and Lila visited in Panhandle Sunday with Mrs. Lill's parents, Mr. and Mrs. O. R. Beddingfield.

Mrs. D. C. Gamble and Karen left Sunday for Bridgeport to stay with Mr. Gamble until today.
